

Save A Drop® WATER TIMER

WATER TIMER

Take control of your garden's watering schedule

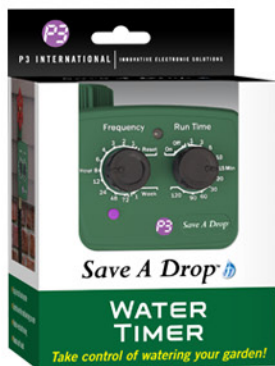

Water your garden with the kind of control that makes sure you never waste a drop. The Save A Drop® Water Timer gives you the capability to determine when you water your garden and for how long.

Just install 2 AA batteries (not included), attach it between your faucet and hose, and you're ready to go. Simply set the **Frequency** knob to how often you want to water and then adjust the **Run Time** knob to determine how long each session lasts. Select between 1 hour to 1 week intervals that can last from 1 to 120 minutes.

The weather-resistant housing is tough and durable for years of trouble-free use. Battery powered with a manual on/off switch, you can choose to turn the unit off if local rainfall meets your needs. Great for misting applications as well as irrigation.

With the Save A Drop Water Timer you can have a garden that grows while your water bill shrinks.

- Easy to install and operate
- Control how often and how long you water
- Weather-resistant housing
- Manual on/off switch

Specifications	
Model:	Q1156
Operating Voltage:	3V DC
Battery:	2 x AA (1.5 V)
Battery life:	1 season (6 months) normal use
Time error:	+/- 2 sec. per 24 Hours
Operating temperature:	34° F to 140° F
Water pressure:	0.75 psi to 116 psi (0.05 bar to 8 bar)
Connectors:	3/4" GHT
Dimensions:	W 3-1/2" x H 3-3/4" x D 3-3/4"
Weight:	7.7 oz. (without batteries)
