

Kill A Watt® CO₂ Wireless Accessory Sensor

Unleash the power of your Kill A Watt® CO₂ Wireless with this Accessory Sensor. Adding additional sensors to your network lets you monitor multiple appliances at the same time. You can use up to eight sensors simultaneously! Applications include; comparing the efficiency of multiple devices, monitoring power consumption in different rooms, and individually measuring the components of your home theater or workshop.

Using multiple sensors lets you conveniently measure and monitor from a central location. No need to plug and unplug your appliances. The Kill A Watt CO₂ Wireless display will show you the consumption from individual sensors as well as a cumulative measurement. Conduct your own energy audit and determine your carbon footprint. Knowledge is power – adding sensors to your Kill A Watt system increases your awareness and understanding of your impact on our planet.

Requires P4250 Kill A Watt® Wireless Display (sold separately)

- **Wireless Range of up to 300 feet**
- **Accurately measures eight critical units of measurement**
- **Select display of individual or cumulative cost**

Specifications:

Model:	P4255
Operating Voltage:	115 VAC
Max Voltage:	125 VAC
Max Current:	15 A
Max Power:	1875 VA
Transmission frequency:	916.5 MHz
Free field range:	max. 300 ft.
Dimensions:	5 3/8" x 2 3/16" (HxW)
Weight:	6 oz.

Specifications subject to change without notice.
