

**P7600**  
**Sol Mate® Floating Light**

***Charges by day, Lights by night.***

Is it a full moon, or just the glow of the Sol Mate® Floating Light reflecting across the waters edge? The Sol Mate® Floating Light offers gentle illumination to your water garden and adds a wonderful glow to your pool, birdbath, or even across your landscape. The built in white LED lamp will last up to 100,000 hours and ensure years of enjoyment, since the rechargeable batteries can be replaced (unlike the batteries used in other solar products). A full charge will yield up to 10 hours of light. Advanced solar technology allows charging even in partial sunlight, while a built-in photocell turns the lamp on at dusk and off at dawn.

**FEATURES**

- Solar-powered LED lamp
- LED will last over 100,000 hours
- Perfect for ponds and pools
- Recharges without full sun light
- Completely waterproof
