

### P7650 Sol Mate® Floating Colors

*Capture the beauty of a rainbow at night*

Rainbows are one of the world's natural pleasures, yet they occur so rarely. Now, with the Sol Mate® Floating Colors, you can experience the beauty of a rainbow even at night - every night! Sol Mate® Floating Colors creates spectrum colored light, evoking the serene feeling of having a rainbow reflected from your pool, pond, or throughout your entire landscape. The built in high intensity LED bulbs change color from green to red, blue to orange, purple to light blue, even white. They last up to 100,000 hours and ensure years of enjoyment, since the rechargeable batteries are easily replaced. Fully charged, Sol Mate® Floating Colors yields up to twelve hours of light. More smart features include advanced solar technology that allows charging even in partial sunlight and a built-in photocell that turns the unit on at dusk and off at dawn.
