

# CHEMICAL-FREE Water Conditioner™

*Uses the power of magnets to prevent limescale buildup!*

**Fits 1/2 - 3/4 & 1 Inch Pipes**

Limescale buildup is a serious problem in any household with residue that can become as hard as stone, causing a decrease in water pressure and showerheads to spray in every direction. Your pipes and appliances may clog with deposits requiring expensive solutions.

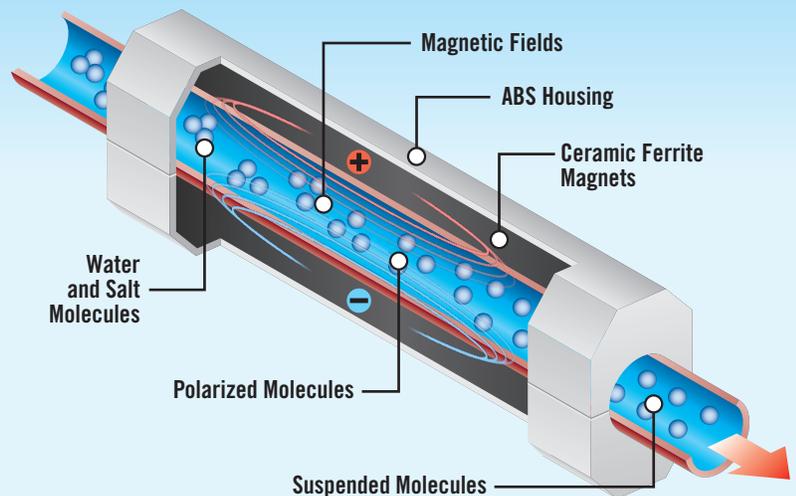

The Chemical Free Water Conditioner™ helps to reduce limescale buildup. Compact, cost efficient and maintenance free, it slides over any water pipe. Reduce buildup without reliance on chemicals, using state of the art high-powered ceramic ferrite magnets that polarize salt molecules in hard water. No moving parts or batteries reducing maintenance and operational cost to zero.

- No plumbing required
- ABS and ceramic ferrite magnets
- Improves life of appliances
- Will NOT alter the taste or health benefits of water
- Works for at least 10 years!

### How It Works:

As water containing the salts that lead to scale buildup (hard water) passes through the magnetic field it becomes electrically polarized. This lessens its ability to cling to pipes and appliances. The hard water minerals remain suspended in the water reducing the effects of scaling and clogging.

### Specifications:

Model:	P7920
Pipe size:	Fits 1/2", 3/4" and 1" pipes
Dimensions:	7-3/4" x 1" x 2" (L x W x H)
Weight:	10.5 oz.

Specifications subject to change without notice.
