

P7900 Sonic Molechaser ®

KEEP BURROWING RODENTS OUT OF YOUR GARDEN FOREVER!

The **Sonic Molechaser ®** is the most humane and environmentally friendly way of keeping gardens and lawns free of destructive ground rodents.

Most underground rodents have poor eyesight, yet nature has given them a very acute sense of hearing and sensitivity to ground vibration. The **Sonic Molechaser ®** exploits this sensitivity to produce a penetrating sonic sound of 300Hz over an area of approx. 11,250 sq. ft. (1/4 Acre) at 15 second intervals.

Sonic Molechaser ® is completely harmless to worms and other underground bugs.

- **Sonic Molechaser ®** operates in a circular pattern, approx. 120 ft. in diameter. This must be an unobstructed 120 ft.
- Place **Sonic Molechaser ®** at site of worst rodent infestation.
- Remove **Sonic Molechaser ®** if ground freezes or when flooding occurs.
- Replace battery after approximately 4-6 months or when sound is no longer audible.
